

Dinesh A

Game Designer

Profile

An artist turned game designer with a strong technical foundation and a focus on gameplay systems and visual storytelling. I specialize in crafting immersive and visually engaging gaming experiences where game mechanics, flow, and user interaction work in harmony. With a background in fine arts and formal Education and Experience in game design, I strive to bridge the gap between artistic vision and functional game play.

I design core gameplay systems, levels, UX flows, and AI behaviors with a user-centric mindset tailored for mobile game experiences. My work emphasizes intuitive interaction, retention, and gameplay clarity, backed by rigorous playtesting and iteration. Skilled in Unity, Unreal Engine, Figma, Maya, and Adobe Suite, I bring an analytical and creative balance to feature and content design.

Employment History

Game Designer Intern at Terrabyte Technologies, Bengaluru

January 2025 — May 2025

- Contributed to the design and development of two core titles: a **soccer mobile game** and a **combat racing game**.
- Designed comprehensive **game flows and UX flows** to guide player experience and retention.
- Tuned gameplay parameters such as difficulty, pacing, and player feedback through **game balancing and tuning**.
- Developed **AI behavior patterns and algorithms** to enhance enemy challenge and immersion.
- Created engaging **levels and core gameplay loops**, ensuring synergy between mechanics and narrative.
- Contributed to **game mechanics and systems design**, aligning player abilities and interactions with game objectives.
- Designed a dynamic **sound design system** for the soccer game to enhance gameplay feedback and immersion.
- Performed **animation quality checks and implementation** for a motion-matching system to ensure fluid and responsive character movements.
- Conducted multiple rounds of **user testing and playtesting-** , collecting feedback and iterating on design.
